Reptiles in Málaga

# CROCODILES

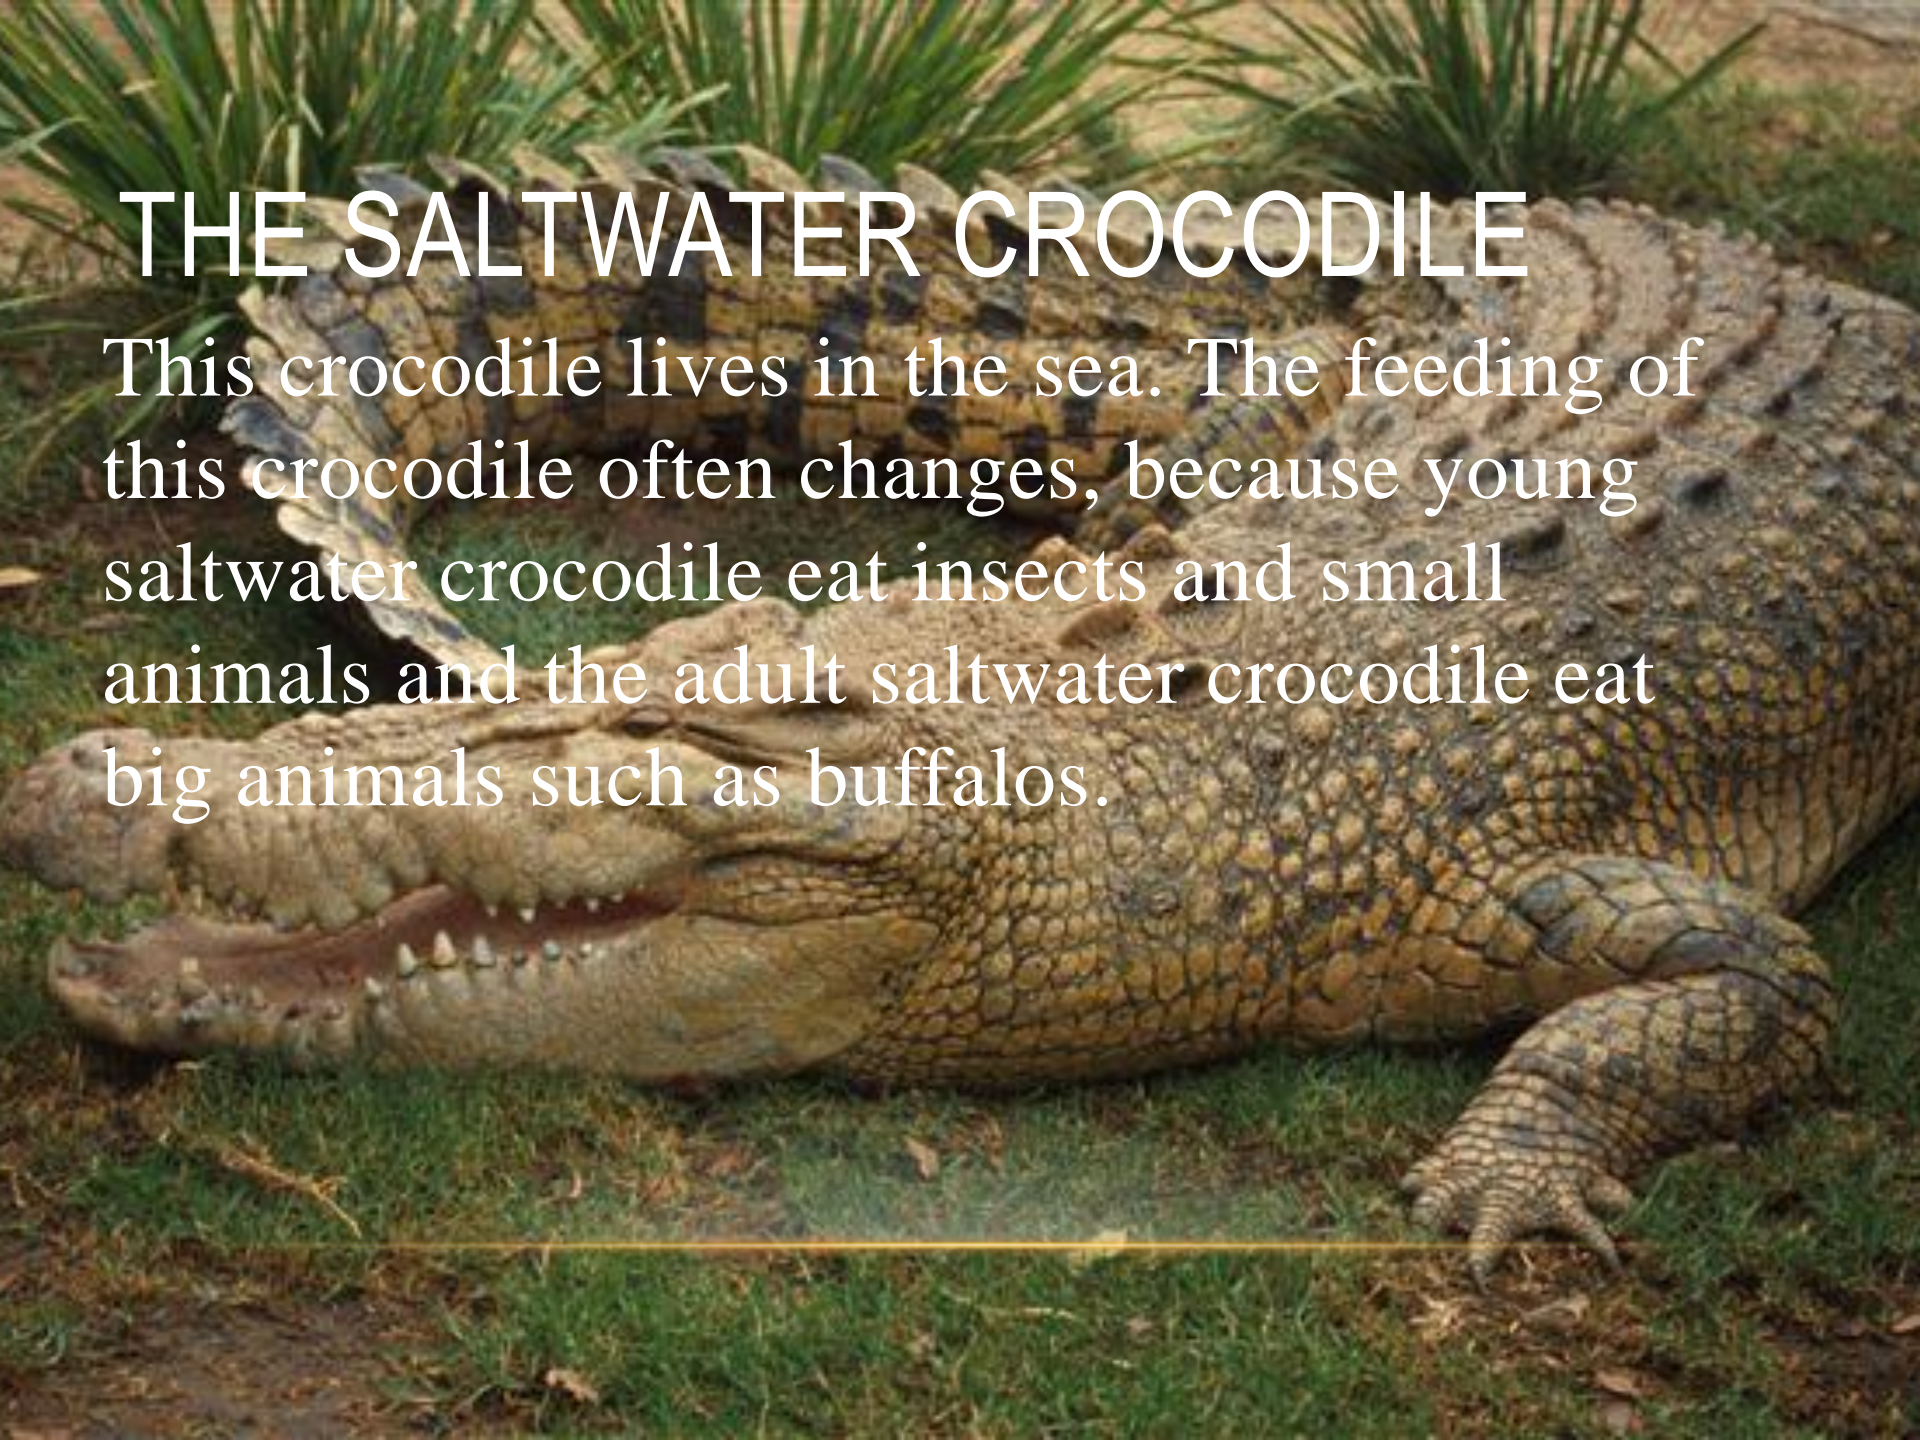

FRANCISCO RIVERO NARVÁEZ

# THE SALTWATER CROCODILE

This crocodile lives in the sea. The feeding of this crocodile often changes, because young saltwater crocodile eat insects and small animals and the adult saltwater crocodile eat big animals such as buffalos.

# THE ALLIGATOR

The alligator is a type of crocodile. It lives in the southeast of Oklahoma. Alligators prefer the fresh water lakes and slowmoving rivers in the Everglades. People have to be careful because alligators eat everything in front of them.

# THE NILE CROCODILE

The Nile crocodile is an African crocodile and may be considered the second largest reptile in the world, after the saltwater crocodile.

This crocodile can eat very big animals such as elephants and buffalos.

# SNAKES

Francisco J. Belgrano Fernández

# COBRA

Cobra is a Portuguese word for snake. It lives in Asia and eats mice and other small animals. It is a famous venomous snake in the world. The Indian cobra is the most dangerous cobra.

# VIPERINAE

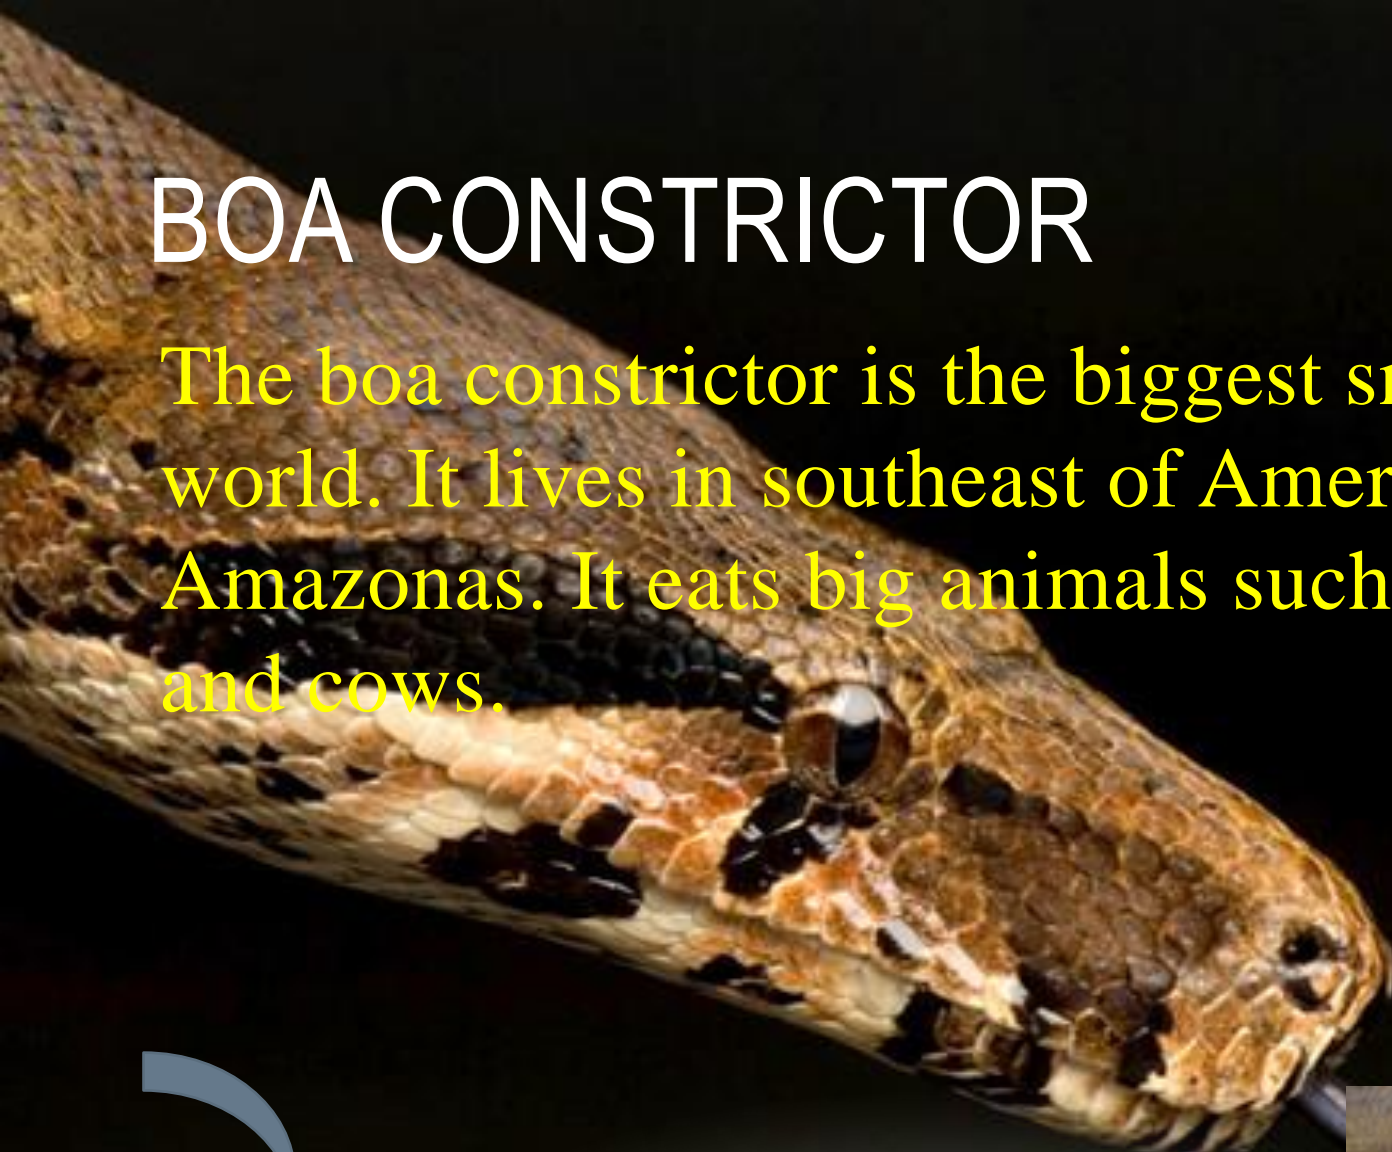

Viperinae is a subfamily of venomous vipers endemic to Europe, Africa and Asia. This snake eats small animals such as mice or small birds.

# BOA CONSTRICTOR

The boa constrictor is the biggest snake in the world. It lives in southeast of America, in the Amazonas. It eats big animals such as boar and cows.

# KOMODO DRAGON

NICOLÁS GUTIÉRREZ RUBIO

A large Komodo dragon is shown in a close-up shot, facing right. Its body is covered in thick, scaly, brownish-grey skin. Its mouth is slightly open, and a long, pinkish, forked tongue is extended outwards. The background is a blurred natural setting with green foliage and brown earth.

**The Komodo dragon is a specie of lizard that lives in the Indonesian islands of Komodo. It is the largest living lizard. They grow to an average length of 2–3 meters and weigh around 70kg.**

**Komodo dragon bites can be very dangerous and they sometimes attack people.**

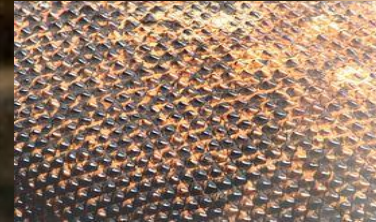

**The Komodo dragon has other names. It can also be called the Komodo monitor or the Komodo Island monitor by some scientists, but this is not very common.**

**It has a tail as long as its body.**

**It also has a long, yellow, forked tongue. Also its skin is very bright hot pink color.**

**The Komodo dragon likes hot and dry places and lives in dry open grassland, savannah and tropical forest on lower land.**

**Komodo dragons are carnivores.**

**The Komodo dragon's diet includes invertebrates, other reptiles (including smaller Komodo dragons), birds, bird eggs...**

# DINOSAUR

RUBÉN RUÍZ ÁLVAREZ

# CARNIVOROUS DINOSAURS

Reptiles have lived in the world four million years. There were lots of reptiles such as dinosaurs. Some dinosaurs were carnivores such as the Tyranosaur and the Velociraptor. Carnivoros ate other herbivorous dinosaurs.

# HERBIVOROUS DINOSAURS

Other dinosaurs ate plants and vegetables such as Triceratops and Brachiosaurus. The Brachiosaurus had the biggest neck in the world. Lots of herbivores died because the carnivores ate them.

15

# FLYING DINOSAURS

Other dinosaurs could fly such as Therodactylo and Archaeopteryx. They ate insects and small fish. They could escape from the carnivores. They were reptiles.

# REPTILES IN MÁLAGA

In Spain, there are lots of parks and zoos with reptiles, they live in their favourite habitat.

In Malaga, we have three places with this type of animals: Selwo Aventura, Biopark Fuengirola and the Crocodile park.

---

# SELWO AVENTURA

The Selwo Aventura is in Estepona (Málaga).

There are lot of reptiles such as snakes, crocodiles.... The snakes are in a small dark house in their natural habitat.

SELWO  
AVENTURA  
ESTEPONA

# BIOPARC FUENGIROLA

In Fuengirola Zoo, there are new reptiles such as Komodo dragons. They live in some Indian ruins. It has lot of food and water to swim. The tamer of Komodo dragon has to be careful because the Komodo dragon is carnivorous.

# FUENGIROLA

# CROCODILE PARK

The crocodile park is the biggest place with crocodile in Andalusia. There are lots of types of crocodile. The biggest is "Paco", a Nile crocodile with 3,5 metres long. If you wish, you can hold a baby crocodile in your arms.
