

Las Vegas and The Death Valley

Pablo Manuel Peralta Porras
Alejandro Ruiz Salazar
Jose García Florido

LAS VEGAS

- Las Vegas is the largest city in the State of Nevada. It is one of the main tourist destination of the country thanks to its commercial and leisure areas, but above all thanks to its casinos. As a result, it is known as "The Capital of the entertainment».

History and Location

- Las Vegas is located in the Mojave Desert, in which there were a number of humid zones. A Spanish adventurer in 1829 named it Las Vegas.
- The area was sparsely inhabited by Paiute Indians. The first white settlers were the Mormons around 1855. In this year, they became part of the United States.

The Death Valley

- The Death Valley's Badwater Basin is the point of the lowest elevation in North America, at 282 feet (86 m) below sea level.
- The Death Valley's Furnace Creek holds the record for the highest reliably reported air temperature in the world.

- The Death Valley is located in the Mojave desert and in the Country of Inyo. This National Park is protected because of its beauty and for having impressive numbers. It has 13.517 km² and its lowest point is 86 metres of depth. In this wonderful place, it is the Amargosa River which is one of the longest rivers of America.

- The Death Valley is one of the best geological examples of a basin and range configuration. It lies at the southern end of a geological trough known as Walker Lane, which runs north into Oregon.
- Furnace Creek and the Amargosa River flow through the valley but eventually disappear into the sands of the valley floor.

THE END
